Please be sure to include a 2" bleed around the perimeter. DO NOT design any critical elements (text, logos, etc.) within 2" of the edge (Cyan area is recommended safe area)

Seam line ***Safe area***

File Format: PDF and TIF

Note to Designers:

– All graphic files must be built at 150 dpi at the overall graphic layout size.

– All graphic file must be created using CMYK mode to ensure the best color matching. If you would like a specific color matched, you MUST provide a PMS color or we cannot guarantee color matching.

– It is best to flatten all images and outline all text to ensure that nothing will drop out or change during file transfer.

– Be aware of Safe Viewable Zone and Guides that may cut your important elements off. Using guidelines will keep margins on your radar and prevent mistakes.

– The "Bleed Zone" are hidden inside the hardware. However, it is STRONGLY recommended that you extend your background graphics to the edges of artboard to ensure proper bleed with no visible unprinted areas.
